

## Ethics Lab

### 1. PRESENTATION

In small groups, you will present on a topic of your choice on Ethics in Science. You should endeavour to relate your topic to AI and Computing. Each group will present to the whole class. Your presentation should be around 10 minutes with 5 minutes for questions and discussion.

Suggested topics include:

- (1) What does the Post Office Scandal teach us about trust in computers over people?
- (2) How is diversity in design an issue, and how can we help?
- (3) How did the Cambridge Analytica scandal affect how we think of our data?
- (4) What does Responsible Research and Innovation mean for your area of research?
- (5) What should we do about fake scientific papers?
- (6) Do scientists have a duty to be climate activists?

You are welcome to select another topic within Ethics in Science. Please talk to Alison to confirm that it is appropriate.

Please note that this work will not be assessed.

### 2. 14TH FEBRUARY PRESENTATIONS

Groups 1, 9

### 3. 21ST FEBRUARY PRESENTATIONS

Groups 2, 5, 6, 8, 10

### 4. STILL TBD

Groups 3, 4, 7, 9, 11.
